

► OpenClaw Quick-Start Cheatsheet

// Install, configure, and connect your personal AI assistant

1. Install OpenClaw

On any Linux server (VPS recommended):

```
curl -fsSL https://get.openclaw.ai | bash
```

On macOS (Homebrew):

```
brew install openclaw/tap/openclaw
```

Verify installation:

```
openclaw --version
```

2. Start the Gateway

```
openclaw gateway start
```

Check status:

```
openclaw status
```

View logs:

```
openclaw gateway logs -f
```

3. Connect Telegram

Get your bot token from **@BotFather** on Telegram, then:

```
openclaw config set telegram.token YOUR_BOT_TOKEN
```

Restart gateway:

```
openclaw gateway restart
```

Send /start to your bot on Telegram to test.

4. Set Your AI Model

OpenClaw supports multiple providers. Configure your primary model:

```
openclaw config set agents.defaults.model anthropic/claude-sonnet-4-20250514
```

Or use a local model with Ollama:

```
# Install Ollama
curl -fsSL https://ollama.com/install.sh | sh
ollama pull llama3.2:3b

# Configure OpenClaw
openclaw config set agents.defaults.model ollama/llama3.2
openclaw config set llm.ollama.baseUrl http://127.0.0.1:11434
```

5. Configure Your Identity

```
openclaw workspace init ~/.openclaw/workspace
# Edit these files:
#   SOUL.md – who the AI is
#   USER.md – who you are
#   MEMORY.md – long-term memory
openclaw gateway restart
```

6. Install Skills

Skills give OpenClaw superpowers – web search, calendar, email, etc.

```
openclaw skill install clawhub/web-search-exa
openclaw skill install clawhub/telegram-bot
openclaw skill install clawhub/github
openclaw skill install clawhub/gog # Gmail, Calendar, Drive
```

7. Key Commands Reference

```
openclaw status           # Health check
openclaw gateway restart  # Apply config changes
openclaw config list      # Show all settings
openclaw skill list       # Installed skills
openclaw skill update --all # Update skills
openclaw sessions list    # Active chat sessions
openclaw logs             # Recent logs
```

 **Pro Tip:** Use openclaw cron add for scheduled tasks like daily briefings, weather reports, or weekly analytics checks.
